The project is also fully open source, and can be downloaded for free.FILE PHOTO: A Facebook sign is seen in this June 28, 2013 photo illustration in New York. REUTERS/Shannon Stapleton/Illustration/File Photo (Reuters) - Shares of Facebook Inc FB.O climbed as much as 2.5 percent on Monday after the social media giant filed its second-quarter results, giving shareholders some much-needed good news following the company's botched messaging-app rollout. Facebook reported a 1.22 billion monthly active users, up from 1.19 billion a year earlier, beating the average analyst estimate of 1.12 billion users from Refinitiv. Revenue of $10.18 billion, below analyst estimates of $10.21 billion, hurt the company's share price in the early trading session but eventually offset losses in its advertising business which took an $812 million hit. "Management's suggestion that core advertising growth decelerated in the second quarter did not reflect user growth, but rather a more difficult comparison from previous periods," said Morningstar analyst Evan Gahan. Facebook's users spend an average of 30 minutes a day on the platform, roughly half of which is on mobile. Investors have been worried that slowing growth in mobile will hurt revenue as advertising becomes less profitable on phones than on PCs and other devices. Facebook's monthly active users are still growing by 6 percent, in line with expectations, and it said that its user base grew in both developed and emerging markets, showing that despite an initial slowdown, the company's user base is still growing. Global users, in particular in places like India and Brazil, were slower to adopt smartphones and mobile apps, and have been the biggest challenge to Facebook's growth in recent quarters.Ryan Yates, I'm okay and safe at home.
