TazeTSchnitzel Why do you mean? The article says that it's an iPad only app, not the

other way around. Arterial changes in untreated systemic lupus erythematosus and their relationship to clinical and laboratory variables. Thirty-eight patients with untreated systemic lupus erythematosus were followed for one year. Arterial changes were detected in 25 (66%) patients by digital subtraction angiography (DSA). Twelve (32%)

patients had angiographically documented vascular abnormalities. The most frequent clinical manifestations were Raynaud's phenomenon (26 patients), stroke or transient ischemic attack (16 patients), and Raynaud's symptoms without vascular changes (13 patients). Four patients had ischemic limb loss. There was no relationship

between the presence or absence of vascular abnormalities and systemic manifestations of lupus erythematosus. Cardiac manifestations were detected in 8 (21%) patients. Vascular abnormalities were more frequent in the patients with cardiac manifestations (p less than 0.01). For each patient, multiple arterial segments

The majority of engineers, however, have a good knowledge of the extension of the major landmark buildings of the district. The centre is a

Looking for a good way of making multiple windows from a model or 3d scene Is there a simple way to take a model or 3d scene, and create windows in viewports that match up with the location in the model/scene? I would like a way to do it with a rectangular shape and the ability to specify the window size. So it's like Viewport > Create Window > Choose shape > Choose size. Or maybe even using custom widgets. If there's no easy way, could someone write it up and include the code? A: You can use a viewports property panel (see here for more details). You can create multiple viewports, and each viewport can be of different shapes. Share Dive Brief: American Electric Power Co. (AEP) is paying the U.S. government \$8 million to settle charges that it withheld necessary worker protections from unionized employees, as required by federal law. An online investigation published by Reuters on Tuesday revealed that AEP had not maintained a list of representative trades for each of its five Texas locations, as required by the United States Department of Labor's Occupational Safety and Health Administration. AEP has been in violation of federal law since 2011. Dive Insight: While this case isn't the first of its kind, it is a new look at the problem, one that appears to be widespread, as a former OSHA official said. "If you believe that government is serving to protect our health and safety, it's very disheartening to find that so many employers simply don't comply with OSHA or the law at large," Steve Owens, who was an official in the OSHA's Denver office, told Reuters. "It's a violation of trust for the American public and for our nation's workers," he added. "Industry is worse, but it's very disappointing that when it comes to workers, OSHA can't seem to get the job done." Another new wrinkle is that, this time, AEP was caught red-handed. "We were able to catch them in the act. But they don't seem to care when
