AutoCAD Architecture AutoCAD uses a menu-driven interface. Individual objects and types are controlled by menus and sub-menus. For example, when a new type is created, the type menu includes an option for creating a new type from an existing type or from a block template. You can open and save files in different file types. The majority of files are saved as AutoCAD drawings that are compatible with AutoCAD. File Types All AutoCAD drawings are compatible with AutoCAD. However, it is recommended that you save a new drawing as a.dwt file. The.dwt file has the most powerful and largest data file size, which increases the speed of saving and editing a drawing. The.dwt file extension is used for text, curves, and shapes. You can easily edit and resave the.dwt file to a drawing. The.dxf file extension is used for blocks, text, and dimensions. Each block has a label, and dimensions include length, width, and depth. A block is a collection of drawing objects. It is also possible to edit and resave the.dxf file to a drawing. The.iges file extension is used for triangular and polygonal solids, surfaces, and edges. The.iges file extension allows you to edit and resave the.iges file to a drawing. A.3dm file extension is used for wireframes and 3D objects. The.3dm file extension is for model data that can be edited and resaved. The.wdm file extension is for 3D views, tables, and rotations. The.wdm file extension is used for viewing three-dimensional data that can be edited and resaved. You can edit and resave many files, and all of these files can be opened in AutoCAD. User Interface You can select objects, edit them, move them around, and remove them from drawings. Objects are selected by clicking on them. Objects are available for selection in several ways. The Object Selector displays objects as icons and name boxes. In the drawing area, the Object Selector displays small icon images of the selected object. You can also type in the name of the object. When an object is selected, it is treated as a drawer. All objects are selectable and can be moved in
